

+ Energy Facade

The thermal energy facade

DEKTON

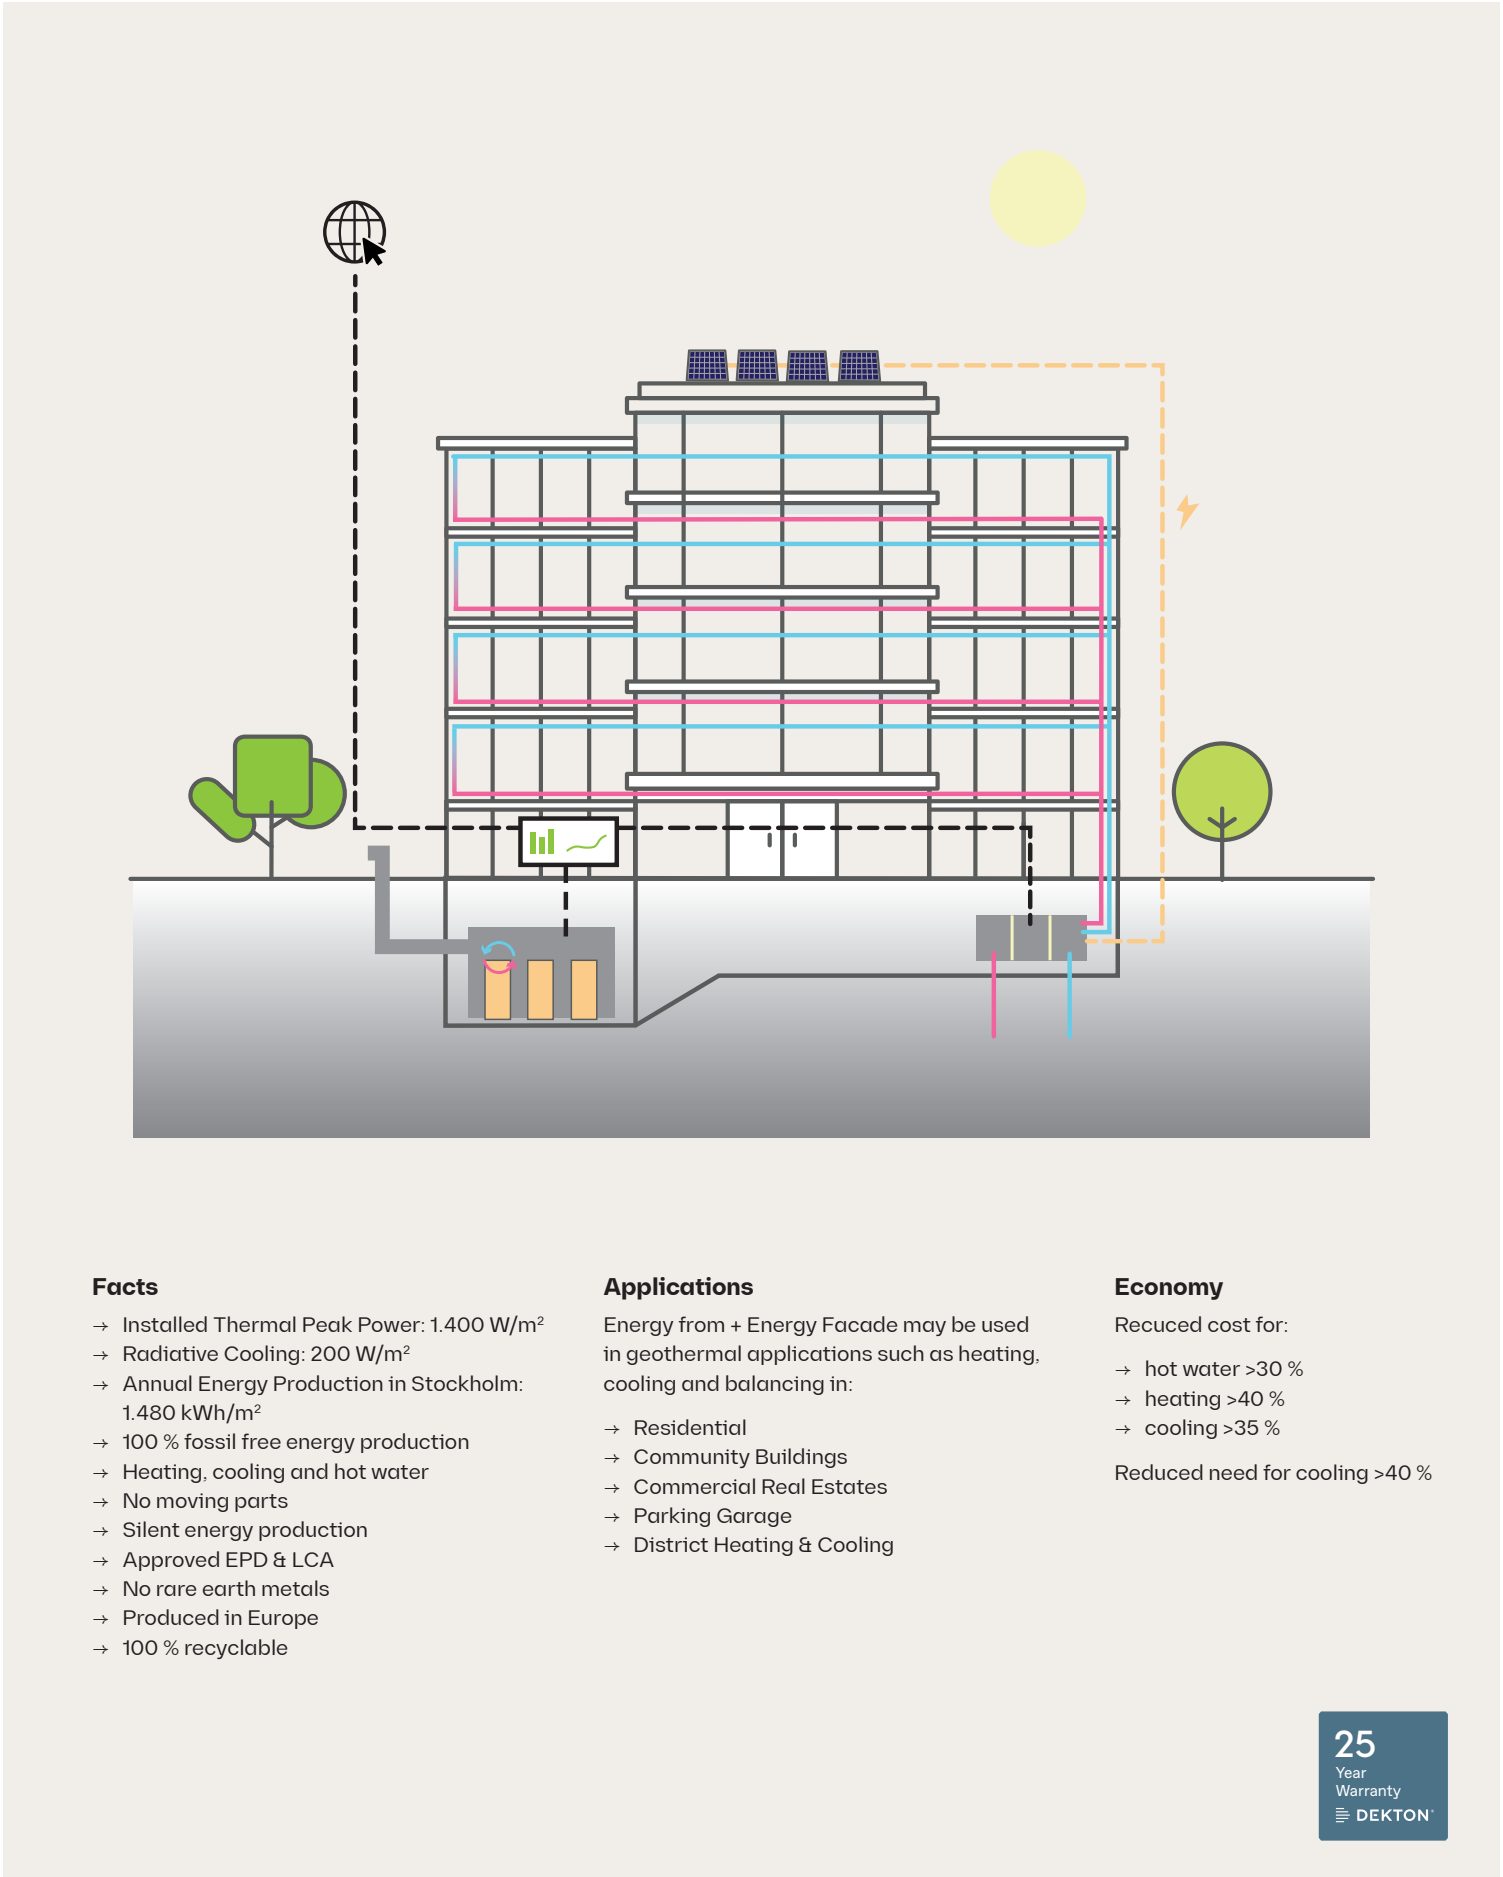

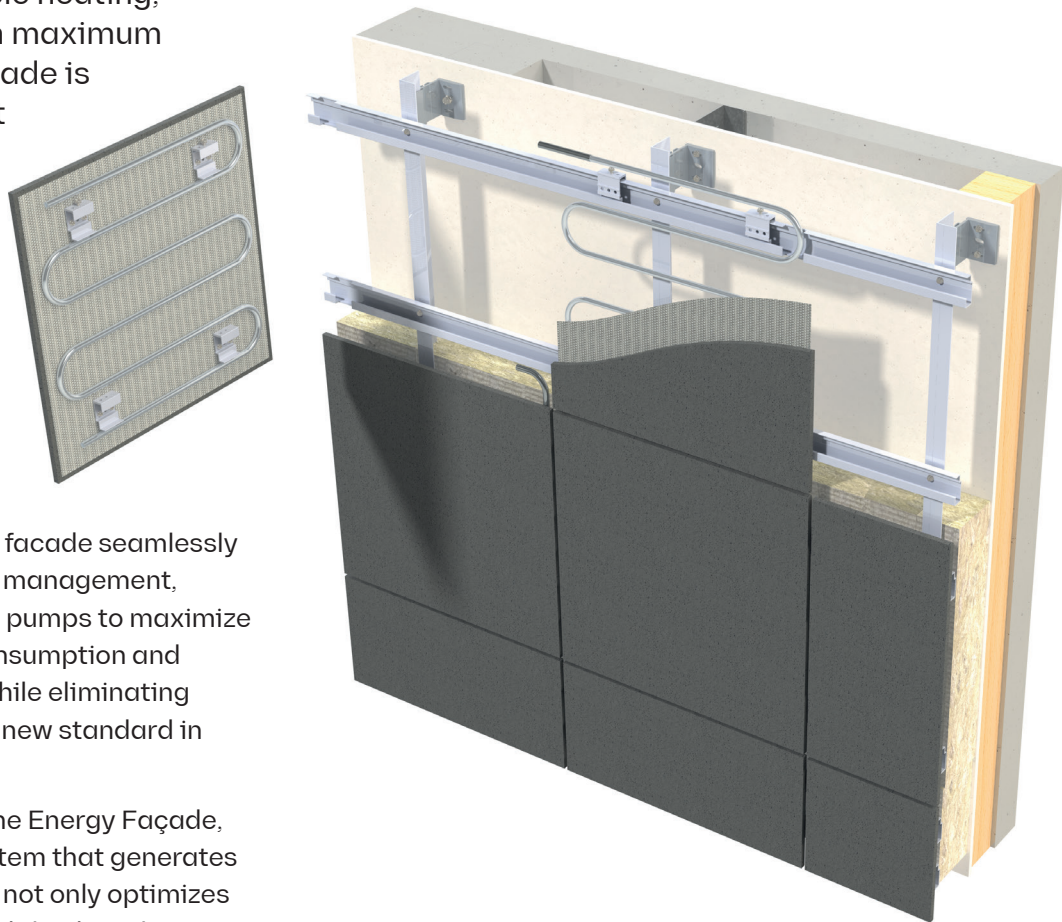

Sustainable Energy Solutions with + Energy Facade

Our integrated green energy systems combine solar power, heat pumps, and geothermal storage to deliver sustainable heating, cooling, and ventilation with maximum efficiency. The + Energy Facade is a revolutionary solution that generates thermal energy without altering the building's appearance. Completely silent and capable of producing energy even without direct sunlight conditions, it ensures a continuous and optimized energy supply.

Our state-of-the-art solar energy facade seamlessly integrates with intelligent energy management, thermal energy storage, and heat pumps to maximize efficiency. By reducing energy consumption and operational costs by over 80 %, while eliminating CO₂ emissions, our system sets a new standard in sustainable energy.

At the heart of our innovation is the Energy Façade, a highly efficient solar energy system that generates clean power directly on-site. This not only optimizes energy performance and sustainability but also enhances property value and supports top-tier certifications such as BREEAM, LEED and DGNB.

Unlock new opportunities with green financing and take the next step towards a carbon-free future with our advanced energy solutions.

Copa Solar is a Swedish company specializing in solar energy products and green energy systems. With years of experience as an OEM supplier and energy consultant, we have accumulated extensive knowledge through strategic partnerships and successful installations. As a product developer and active participant in energy system projects, we continuously refine our methods and materials to drive innovation forward. Our expertise and resources are dedicated to delivering tailor-made, high-precision energy solutions that meet the needs of both local and global businesses. By combining innovation with technical excellence, we empower our customers with sustainable and efficient energy solutions designed for the future.

COSENTINO®

The Cosentino Group is a global, family-owned Spanish company that manufactures and distributes innovative, sustainable and valuable surface materials for the design and architectural world. We work with our customers and partners to deliver solutions that inspire people's lives by acting responsibly and transparently on ESG issues. Dekton is a carbon-neutral ultra-compact material. With an optimized manufacturing process, inspired by the beauty and aesthetics of natural stone that goes beyond nature and achieves the highest performance. With a wide range of colours and sizes, Dekton inspires the future of architecture and design, by creating meaningful spaces where beauty and functionality coexist in perfect synergy.

SFS is the specialist for fastening solutions in the building envelope. With the invention of the first rust-free self-drilling screw in the world, SFS laid the cornerstone for modern fastening systems more than 30 years ago. Since this pioneering achievement the development and manufacture of fastening systems for the construction industry has belonged to our core expertise. You have specific ideas – we develop new and specific solutions.
